Comparing to human-level performance

---

Why human-level performance?

# Comparing to human-level performance

# Why compare to human-level performance

Humans are quite good at a lot of tasks. So long as ML is worse than humans, you can:

- - Get labeled data from humans.  $(x, y)$
- - Gain insight from manual error analysis:  
Why did a person get this right?
- - Better analysis of bias/variance.
